

Summary of presentation by Iwona Maciejowska

Some results of the first year of the STEM-CPD @ EUni project, which may be of interest to ECTN members, will be presented. These will include the conclusions from the last year's survey on the development of teaching competences at European Universities, information on MOOC courses for chemistry lecturers, examples of the user cases in Continuous Professional Development developed in the framework of the project and an invitation to the summer school for CPD-Ambassadors, which will be held in October this year in Krakow, and also for the afternoon session of the Lecturing qualifications and innovative teaching methods conducted by Dr. Natasa Brouwer.
